CASE LAW

This case law section provides references to an expert who has been cited or mentioned in case opinions (reported and unreported), briefs (where available), jury verdicts, dockets, and expert challenges for both state and federal courts. It is again noted that not every jurisdiction and every court makes their case law available, and this profile is limited as such.

The following search strings were run to ensure that all available cases and briefs are captured.

((Jon or John) w/2 (Doe or "Doe-Miller")) or (("Doe-Miller" or Doe) w/50 Expert and (Emergen! or Medicine or Family))) and not ("John R. Doe")

The following legal databases were looked at during the preparation of this report:

1. Federal and State Cases Combined, Jury Verdicts and Settlements, Federal Agency Decisions, State Agency Decisions
2. Court Documents – Trial Filings, Appellate Briefs, Trial Orders, Dockets
3. PACER was searched to retrieve original documents, if available.
4. Google Scholar – Legal Opinion Search

Availability of Supporting Documents

In the course of research, many relevant documents such as opinions, briefs, pleadings, deposition transcripts, motions to exclude, rulings, expert reports, expert CVs etc. are retrieved from various sources. These documents are divided into three categories:

1. Available for Download for no additional cost (These are mainly opinions for which no cost is incurred on the part of AMFS.)
2. Available for Instant Delivery (These are documents which can be delivered within one business day after payment.) To know the cost of these documents and to order, click on **(Request Document)** next to the document to send an email with the relevant document title and the Case Caption.
3. These are documents which cannot be procured electronically and can be obtained only from the court. These documents do not have **(Request Document)** mentioned against them. To know how these documents can be procured, please send a mail to info@amfs.com with the relevant document title and the Case Caption.

DIRECT CHALLENGES

This section includes reported, and numerous unreported cases from both state and federal jurisdictions where a “gatekeeping authority” has been cited or mentioned in a decision and the testifying expert’s methodology or qualifications have been challenged. Gatekeeping authority is defined as a seminal decision or rule of evidence that defines or interprets the standards for admissibility or expert witness testimony for the corresponding jurisdiction. This section includes results from over 165 gatekeeping authorities, including but not limited to *Daubert v. Merrell Dow, Frye v. United States*, and their progeny. Sources for unreported decisions include docket sheets, litigation reports, jury verdicts, and other online resources. Although care has been followed to gather this information, not all cases involving expert challenges are reported.

Motion to strike denied.

Judge(s): Mary DeGenaro, Joseph J. Vukovich, Gene Donofrio

Date(s): 03/26/2009

Summary of Involvement: Doe an emergency room physician, was retained by the Defendant as an expert in the instant case. The Appellate Court observed *"Prior to trial, Ross filed a motion in limine requesting, inter alia, an order prohibiting MVES from introducing any evidence or testimony from Dr. John Doe regarding the existence of a condition called thrombocytopenic purpura (TTP), or the issue of survivability. The trial court overruled the motion in limine."* The Appellate Court further observed *"The trial court initially denied the motion in limine. However, prior to Dr. Doe's testimony at trial, Ross renewed the motion, and after an initial sidebar an incamera hearing was held to decide it. The court ultimately ruled that Dr. Doe could not testify about any medical conditions that were not known to Dr. Jackson when he treated Darlene. Thus, the trial court precluded proximate cause testimony, limiting Dr. Doe to testify only about the standard of care. MVES contends this limitation constitutes prejudicial error. Ross counters that MVES failed to proffer Dr. Doe as a proximate cause witness."* The Appellate Court concluded *"All of MVES' arguments are meritless. With regard to the evidentiary matter, MVES failed to adequately proffer the testimony at issue. MVES failed to explain during the in-camera hearing that Dr. Doe would provide proximate cause testimony relating to the issue of medical management."* The judgment was affirmed.

Judge(s): Ann Dyke, Melody J. Stewart And Larry A. Jones

Date(s): 05/07/2009

Summary of Involvement: Doe was retained by the Defendant as an emergency room expert in the instant case. The Appellate Court held *"We find no abuse of discretion in this matter in light of the [**14] evidence presented which indicated that, following the third intubation, bilateral breath sounds were observed, Kevin was noted to be emitting CO2, and his pulse oxygen level increased to 98 percent, all of which signified a successful insertion of the endotracheal tube. According to Dr. Doe, the successfully placed tube could have moved due to movement of the decedent's head prior to autopsy, so there was evidence from which the jury could conclude that the physical facts as determined at the time of autopsy were not the same as those existing following the third intubation. We therefore find that the trial court did not abuse its discretion in denying the motion for a new trial."* The judgment was affirmed.
